SMART-HEAT ELECTRIC

An infrared electric heater blending aesthetics and function

Witness the art of smart-heating with Bromic Heating's new Tungsten Smart-Heat™ Electric, an infrared electric heater blending aesthetics with function.

The Tungsten Smart-Heat™ Electric is stylishly designed to provide efficient directional heating for commercial and residential locations.

Available in 4 models of varying heating power and compatible with smart control systems to enable precise dimming control. Included are wall and ceiling mounting brackets to allow adjustable angle of the heating direction with simple one-touch on/off switch.

Heaters are equipped with a spectral reflector for excellent radiant heat output and are weatherproof.

*Alternatively, short mounting brackets can be used for wall mounting of the 4000w & 6000w models to position the heater closer to the wall. Short mounting brackets must be purchased separately.
